

I just wanted to write to you on behalf of my husband and I.

Jaxen has been at the SMLC now for about 3/4 of a year and his development, skills and happiness has grown exponentially. The love and care he receives at the SMLC is only matched by the attention to learning, and he rivals the skill sets of children a year to two years older than him.

We have friends that take their children to other day homes and daycares ,and although they say that they spend less each month on child care, I have to point out that at SMLC the investment is reflected in the child that we pick up daily. He is not being babysat, he is being educated, loved, and nurtured by a staff that feels entirely like family. They love the kids and want them to grow and thrive just as much as we do as their parents. A HUGE Thank you to your entire staff, you help us everyday in raising a great little boy whos emotional, and intellectual needs are filled to the brim!

Hope and James L.
